william blair equity research: Managing Complexity in Global Organizations Ulrich Steger, Wolfgang Amann, Martha L. Maznevski, 2007-04-04 This book delivers new IMD insights on an emerging challenge - how to deal with overwhelming complexity. Global organizations face a complex decision-making environment. On one side, diversity of cultures, customers, competitors and regulations creates complexity; on the other, competitive pressures cause expanding countries to extract more synergies across products and regions. In such a climate, a new way of thinking, acting and organizing is needed beyond the familiar 'control' mindset. Drawing together insights from across the expert faculty, Managing Complexity in the Global Organization presents IMD's framework on how to understand complexity and its four key drivers (diversity; interdependence; ambiguity and flux), along with solutions on specific issues in a variety of functions, industries and markets. The focus is on providing practical solutions based on real-life examples.

william blair equity research: The Wide Lens Ron Adner, 2012-03-01 How can great companies do everything right - identify real customer needs, deliver excellent innovations, beat their competitors to market - and still fail? The sad truth is that many companies fail because they focus too intensely on their own innovations, and then neglect the innovation ecosystems on which their success depends. In our increasingly interdependent world, winning requires more than just delivering on your own promises. It means ensuring that a host of partners -some visible, some hidden- deliver on their promises, too. In The Wide Lens, innovation expert Ron Adner draws on over a decade of research and field testing to take you on far ranging journeys from Kenya to California, from transport to telecommunications, to reveal the hidden structure of success in a world of interdependence. A riveting study that offers a new perspective on triumphs like Amazon's e-book strategy and Apple's path to market dominance; monumental failures like Michelin with run-flat tires and Pfizer with inhalable insulin; and still unresolved issues like electric cars and electronic health records, The Wide Lens offers a powerful new set of frameworks and tools that will multiply your

odds of innovation success. The Wide Lens will change the way you see, the way you think - and the way you win.

william blair equity research: *Research Handbook on Law and Ethics in Banking and Finance* Costanza A. Russo, Rosa M. Lastra, William Blair, 2019 The global financial crisis evidenced the corrosive effects of unethical behaviour upon the banking industry. The recurrence of misbehaviour in the financial sector, including fraud and manipulations of market indices, suggests the need to establish a banking culture that conforms to the highest standards of ethical and professional behaviour. This Research Handbook on Law and Ethics in Banking and Finance focuses on the role that law should play and the effectiveness of newly introduced regulations and supervisory actions as a driver for ethical conduct so as to reconnect the interests of bankers and financiers with the interests of society.

william blair equity research: Issues in Business Ethics and Corporate Social Responsibility SAGE Publishing, 2020-03-19 One need only look at the news to be bombarded with examples of corporate malfeasance and the impact such behavior has on a company's public image, customers, employees, and bottom line. And while these stories grab the headlines, some companies are adopting practices that display awareness of their impact on the globe, whether that be to the environment, its employees and suppliers, or communities in which they do business. What factors are leading to these decisions? What are the benefits and costs of making ethical business decisions and acting in a socially responsible way, however one defines it? Issues in Business Ethics and Corporate Social Responsibility explores these foundational themes across a wide range of topics, including artificial intelligence, workplace surveillance, supply chain management, big data, the finance industry, and many more. Coupled with a broad introduction by Dr. David Weitzner, a

professor of management at York University, this book provides students with the essential information they need to assess business practices through the lens of ethical decision-making and corporate social responsibility.

william blair equity research: *As Três Regras* Michael Raynor, 2015-05-26 Em todos os setores há uma organização atípica. Na indústria farmacêutica, temos a Merck. No varejo de descontos, a Family Dollar. Entre os fabricantes de doces, a Wrigley era inigualável, assim como a Maytag nos eletrodomésticos. Outros astros permaneceram mais discretos, como a Heartland Express no setor de transporte (caminhões), ou a Linear Technology em semicondutores. Como essas empresas excepcionais alcançaram um desempenho superior e duradouro apesar de enfrentar as mesmas dificuldades que os concorrentes? O que fazem de diferente? O que podemos aprender com elas? Michael E. Raynor e Mumtaz Ahmed analisaram mais de 25 mil empresas, com dados que cobrem um período de 45 anos. O estudo que levou cinco anos para ser concluído começou com uma sofisticada análise estatística a fim de identificar quais empresas têm um desempenho excepcional 344 no total. Trabalhando em colaboração com equipes de pesquisadores, Raynor e Ahmed colocaram no microscópio uma representativa amostra de 27 empresas escolhidas a dedo para descobrir o que faz uma organização se destacar de todas as concorrentes em um setor e descobriram que diante de decisões difíceis esses formidáveis atores seguem três regras: O melhor antes do mais barato; Raramente competem com base no preço; Receita antes do custo. Impulsionam os lucros trabalhando com preço e volume, e não com drásticas reduções nos custos; Não existem outras regras. Estão dispostos a mudar o que for preciso para permanecerem fiéis às duas primeiras regras.

william blair equity research: *Revisiting the Equity Risk Premium* Laurence B. Siegel , Paul McCaffrey , 2023-06-06 In 2001, Martin Leibowitz organized an Equity Risk Premium (ERP) Forum for CFA Institute, in which the participants discussed issues related to the ERP and made estimates for the future. This forum was repeated by Leibowitz, Brett Hammond, and Laurence Siegel in 2011, setting a precedent for a decennial forum. Siegel organized and moderated the discussion in 2021, and the proceedings from that event make up the current book. The participants in 2021 were (in alphabetical order) Robert Arnott, Clifford Asness, Mary Ida Compton, Elroy Dimson, William Goetzmann, Roger Ibbotson, Antti Ilmanen, Martin Leibowitz, Rajnish Mehra, Thomas Philips, and Jeremy Siegel. Each participant made a presentation, which was then discussed by the whole group. Finally, a roundtable discussion involving all of the participants was moderated by Laurence Siegel. Ibbotson and Dimson discussed historical returns in different countries. Ibbotson focused on the United States, while Dimson took a global industrial-country view. The history goes back almost a century (Ibbotson) or more than a century (Dimson), providing a look at how returns have evolved over a wide variety of conditions. Ibbotson also presented his method for making probabilistic forecasts of returns. Dimson, who is British, showed that “American exceptionalism” is one way to understand the results. Asness looked at the effectiveness of Robert Shiller’s CAPE (cyclically adjusted price-earnings ratio) valuation measure for forecasting. Valuations rose over the period he studied, and a lively discussion was had about why this may have occurred. Arnott focused on the growth rate of dividends, which has been very slow in per-share terms, and argued (with much debate from the other participants) that buybacks are only a partial substitute for dividends. Leibowitz, also looking at valuation as the lodestone of return forecasts, set forth a “growth adjustment” that brought his forecast in line with those made by others. Compton, a consultant to pension plans, discussed the challenges of communicating lower expected returns to clients. She also emphasized that expected returns “don’t always come true,” they’re just someone’s best forecast. Ilmanen broke up the expected return into its component parts: dividends, real growth, inflation, and so forth. Doing this, he said, allows one to debate the estimates for each part and ascertain how accurate each of the estimates is. Philips started by presenting a method for forecasting bond returns. He then turned to equities, for which he compared forecasts with subsequent realizations using a variety of forecast methods. Mehra discussed a number of issues related to the existence of premiums (equity risk, value, small cap, and so forth) and concluded that, although some of these are unstable, the ERP is highly stable. Jeremy Siegel advocated a “back to basics” approach using dividend and earnings yields, dividend and earnings growth rates, payout ratios, and price-to-earnings ratios. He emphasized that earnings can be calculated in a number of different way, and said that accounting practices have become more conservative over the years. Goetzmann concluded the session by reporting that one company, a water mill in France, had almost 600 years of historical return data and that an asset pricing model could be tested using those data. According to this model, the stock price is the present value of expected future dividends and is supported by the evidence. In sum, because of high valuations and low interest rates, the participants expect lower total returns in the future than in the past. A forward-looking ERP of 4% to 5% was the consensus of the group.

william blair equity research: The Three Rules Michael Raynor, Mumtaz Ahmed, 2013-05-30 In *The Three Rules*, Michael E Raynor and Mumtaz Ahmed provide the answer to the ultimate business question: how do some companies manage to keep excelling, year after year after year? 'The objective is to deliver the best possible performance and sustain it for as long as possible' In every sector there's an outlier. An exceptional company that faces the same difficulties as

competitors, but constantly delivers superior results. What are they doing differently? And what can they teach us? Michael E. Raynor and Mumtaz Ahmed analysed 25,000 companies spanning forty-five years to find the answers. What they discovered were three clear rules that the most exceptional companies follow when faced with the most difficult decisions. With a powerful combination of detailed case studies and rigorous data analysis, reading, learning and applying The Three Rules will help your organization become truly exceptional. Michael E. Raynor is a director at Deloitte Services LP, where he explores corporate strategy, innovation, and growth with clients in a variety of industries. He is the coauthor, with Clayton Christensen, of The Innovator's Solution, and the author of the bestselling and critically acclaimed The Strategy Paradox and The Innovator's Manifesto. Mumtaz Ahmed is a principal in Deloitte Consulting LLP and the chief strategy officer of Deloitte LLP, responsible for the U.S. firm's strategy, corporate development, innovation, eminence, and brand.
