East, 2008-12 The story of the Hillabees has been both the Cinderella and the Rodney Dangerfield of Creek Indian history. Until now, it has been neglected and has garnered little respect. But author Don C. East changes that in this extensive historical look at the rise and fall of the Hillabee faction of the Creek Indian tribe and its existence in Clay County, Alabama. Based on research, personal experience, and supplemented with maps and illustrations, A Historical Analysis of the Creek Indian Hillabee Towns uncovers a wealth of new information on these towns, their residents, the Creeks in general, and other Indian and white characters of the period. East's working knowledge of the Creek language produces new information on the meanings of many Creek Indian names and words associated with the Hillabees. Born and raised in the area, being of Creek Indian ancestry, and spending all of his youth and young adult years there, he has a deep personal understanding of the Hillabee Creek Indians and Clay County. The Creek Hillabees may have had a history of less than 300 years, but they secured an important and prominent place in Creek and local pioneer white history during that time frame.

The first manned mission in the Apollo program and the first manned flight after a fire during a launch pad test killed three astronauts in early 1967, Apollo 7 helped restart NASA's manned-spaceflight program. Known to many as a goofy, lighthearted prankster, Eisele worked his way from the U.S. Naval Academy to test pilot school and then into the select ranks of America's prestigious astronaut corps. He was originally on the crew of Apollo 1 before being replaced due to injury. After that crew died in a horrific fire, Eisele was on the crew selected to return Americans to space. Despite the success of Apollo 7, Eisele never flew in space again, as divorce and a testy crew commander led to the three astronauts being labeled as troublemakers. Unbeknownst to everyone, after his retirement as a technical assistant for manned spaceflight at NASA's Langley Research Center in 1972, Eisele wrote in detail about his years in the air force and his time in the Apollo program. Long after his death, Francis French discovered Eisele's unpublished memoir, and Susie Eisele Black (Donn's widow) allowed French access to her late husband's NASA files and personal effects. Readers can now experience an Apollo story they assumed would never be written as well as the story behind its discovery.

If you think the media has told you everything there is to know about Michael Jackson and Casey Anthony, think again! This engrossing, almost cinematic page-turner, offers never-before-published information on the mysterious deaths of Michael Jackson and Caylee Anthony, plus five other ripped-from-the-headlines criminal cases. Based on the authors' long investigative experience, these two insiders offer revealing insights into the following high-profile cases: -Casey Anthony: An assessment of the Trial of this Century, during which a Florida mother stood accused of killing her young daughter, Caylee. At stake were issues that included accuracy of air sampling and cadaver dogs, post-mortem hair banding, chloroform, duct tape identification, computer clues, and deep family secrets. -Michael Jackson: The authors provide never-disclosed data on the autopsies of Jackson's body and a microscopic view of the singer's life and career, plus analysis of the cardiologist charged with his death: Was Dr. Conrad Murphy recklessly negligent or a fall guy for a hopelessly addicted celebrity? -Drew Peterson: Heroic Illinois SWAT team cop or wife killer? Did his third wife slip and fall in the bathtub, or was she beaten and drowned? The controversy over her death led to an exhumation and the filing of homicide charges against him, but can prosecutors prove their case? And what happened to his fourth wife, who remains missing? -Rolling Stone Brian Jones: Was the rock musician's death an accident or something more sinister? And was he impaired by drugs or alcohol when he died? After more than forty years, there is finally an answer. In addition, the authors examine the tragic death of twelve-year-old Gabrielle Bechen, whose rape-murder changed her community; Col. Philip Shue, whose demise was a battle of suicide versus homicide until Dr. Wecht solved the case; and Carol Ann Gotbaum, a respected Manhattan mother who died in police custody in Phoenix.
