wing of zion flight history: *The Historical Writings of Joseph of Rosheim* Chava Fraenkel-Goldschmidt, 2006-09-30 Joseph of Rosheim, sixteenth-century leader of the Jews in the Holy Roman Empire, left historical writings that are presented here in a critical edition published now for the first time in English translation. The principal part of the book is devoted to a Hebrew manuscript--a chronicle--left by R. Joseph, in which he describes incidents from the history of his life and that of the Jews in his day and age. R. Joseph writes with extreme terseness, often in cryptic language, and therefore his chronicle appears here with prefaces, background information and a commentary. The prefaces provide important information about the blood libels and the expulsions, the debate concerning Solomon Molcho's messianic ideas, and the influence R. Joseph exerted at the court of Emperor Charles V. Particularly valuable for the study of Christian-Jewish relations in the Reformation period are two other documents printed here. The "Letter of Consolation," is a long epistle that R. Joseph wrote to the Jews of Hesse in 1541, advising them on how to cope with the harsh decrees enacted against them and discussing the attitudes of some leading Reformers towards the Jews. Also included in the book is his Letter to Strasbourg City Council of July 1543, which contains his response to Martin Luther's anti-Jewish tracts. This book can be considered a sequel to the critical edition (in Hebrew) of R. Joseph's large work, Sefer ha-Miknah, which Chava Fraenkel-Goldschmidt published in 1970. The Afterword discusses some of the most recent research into Joseph of Rosheim's activities and writings.

wing of zion flight history: A History of the Jews in the Modern World Howard M. Sachar, 2006-09-12 The distinguished historian of the Jewish people, Howard M. Sachar, gives us a comprehensive and enthralling chronicle of the achievements and traumas of the Jews over the last four hundred years. Tracking their fate from Western Europe's age of mercantilism in the seventeenth century to the post-Soviet and post-imperialist Islamic upheavals of the twenty-first century, Sachar applies his renowned narrative skill to the central role of the Jews in many of the most impressive achievements of modern civilization: whether in the rise of economic capitalism or of political socialism; in the discoveries of theoretical physics or applied medicine; in "higher" literary criticism or mass communication and popular entertainment. As his account unfolds and moves from epoch to epoch, from continent to continent, from Europe to the Americas and the Middle East, Sachar evaluates communities that, until lately, have been underestimated in the perspective of Jewish and world history—among them, Jews of Sephardic provenance, of the Moslem regions, and of Africa. By the same token, Sachar applies a master's hand in describing and deciphering the Jews' unique exposure and functional usefulness to totalitarian movements—fascist,

Nazi, and Stalinist. In the process, he shines an unsparing light on the often widely dissimilar behavior of separate European peoples, and on separate Jewish populations, during the Holocaust. A distillation of the author's lifetime of scholarly research and teaching experience, A History of the Jews in the Modern World provides a source of unsurpassed intellectual richness for university students and educated laypersons alike.
