williams bay health services: Tales of Forgotten Chicago Richard C Lindberg, 2020-07-24 Hidden gems from Chicago's past Tales of Forgotten Chicago contains twenty-one fascinating, little-known stories about a great city and its people. Richard C. Lindberg has dug deeply to reveal lost historical events and hidden gems from Chicago's past. Spanning the Civil War through the 1960s, the volume showcases forgotten crimes, punishments, and consequences: poisoned soup that nearly killed three hundred leading citizens, politicians, and business and religious leaders; a woman in showbiz and her street-thug husband whose checkered lives inspired a 1955 James Cagney movie; and the first police woman in Chicago, hired as a result of the senseless killing of a young factory girl in a racially tinged case of the 1880s. Also included are tales of industry and invention, such as America's first automobile race, the haunting of a wealthy Gilded Age manufacturer's mansion, and the identity of the telephone's rightful inventor. Chapters on the history of early city landmarks spotlight the fight to save Lakefront Park and how "Lucky" Charlie Weeghman's north side baseball park became Wrigley Field. Other chapters explore civic, cultural, and political happenings: the great Railroad Fairs of 1948 and 1949; Richard J. Daley's revival of the St. Patrick's Day parade; political disrupter Lar "America First" Daly; and the founding of the Special Olympics in Chicago by Anne Burke and others. Finally, some are just wonderful tales, such as a touching story about the sinking of Chicago's beloved Christmas tree ship. Engrossing and imaginative, this collection opens new windows into the past of the Windy City.

williams bay health services: Humane Health Care for Prisoners Kenneth L. Faiver, 2017-05-05 A useful research resource and handy reference, this book discusses the many important ethical and legal issues that arise in the delivery of health care to prisoners at correctional facilities. It references national standards of professional practice as well as the advice of recognized experts. The mission of corrections is the care and custody of prisoners with a view to public safety within a place dedicated to punishment, while the mission of the medical and mental health professionals in a corrections facility is to care for the health and well-being of the prisoners. Both have a duty to provide care, but their differing roles and objectives give rise to ethical role conflict and disagreement regarding appropriate care strategies. Humane Health Care for Prisoners considers important ethical and legal issues that arise in the delivery of health care to prisoners, covering topics such as privacy, confidentiality, informed consent, extended isolation and solitary confinement, use of mace, strip searches and body cavity searches, and medical experimentation on prisoners as human subjects. It also considers participation by health care professionals in capital punishment, coerced substance abuse treatment, how much health care to provide, organizational structure and hierarchy, cooperation between correctional and health care staff, and the importance of recognizing mental illness as a chronic condition. This book is informative for professionals working in corrections facilities, such as physicians, psychiatrists, psychologists, nurses, wardens, jail administrators, sheriffs, and corrections officials, as well as legislators and decision makers, attorneys involved in correctional healthcare lawsuits, students of criminal justice, and those seeking to work in the field of correctional health care or in corrections. Additionally, students and professors of medical ethics will find this book helpful in illustrating real-life topics for research and discussion.
