wings financial sign in: If This World Were Mine E. Lynn Harris, 2012-11-28 Four friends, all graduates of Hampton Institute, keep a collective journal they call If This World Were Mine, and share their personal diaries each month at a gathering filled with humor, gossip, and affirmation. The four group members are as different as the seasons, yet they all share a love of one another. Yolanda, a media consultant, keeps it going on with a no-nonsense attitude and independence that are balanced by the theatrics of Riley, a former marketing executive whose marriage has reduced her to a kept woman with kids. Computer engineer Dwight's anger at the world is offset by the compassion of Leland, a gay psychiatrist whose clients make him question why God ever invented sex. But after five years, the once-strong bonds of friendship are weakening, and the group must handle challenges of work, lost love, and a stranger in their midst. As the group members confront their true feelings toward each other, resentments and long-held secrets surface, and the stability of the group begins to disintegrate. Is their past friendship strong enough to survive the future?

wings financial sign in: The Modern Defense Industry Richard A. Bitzinger, 2009-10-15 Whether it's guns and ammunition or multidimensional anti-terrorism systems, the defense industry is dynamic, complex, and ubiquitous. It is also mysterious, powerful, and controversial, involving

thousands of players worldwide—from suppliers and producers to government and military procurers to shadowy figures that trade in the black market. This comprehensive, two-volume reference will explore, on a global scale, the various issues, concepts, problems, and controversies surrounding the rise of the modern defense industry. Unparalleled in its scope and insight, *The Modern Defense Industry* will prove invaluable to the industry's critics and champions alike. The phenomenon of a more-or-less permanent defense industry—especially one so wide in scale, breadth (air, sea, land, and space), technology, and geography—is still relatively new. Until now, its implications for politics, economics, and technology have not been adequately discussed in an authoritative, accessible format for scholars and researchers, business people, journalists, policymakers, and interested laymen. *The Modern Defense Industry* addresses the period from 1945 to the present, covering the United States, Europe, Russia, China, Israel, and other important arms-producing and arms-procuring countries. Including essays by experts from around the world, a glossary, data on firms and governments, laws and policies, primary documents, case studies, and a host of other elements, this set will be a unique resource for anyone interested in the arms industry. It will also offer penetrating insights into topics like international relations and diplomacy, arms proliferation, and contemporary politics. Volume I comprises chapters by experts in the field on topics like the relationship between the industry, military, and government; how new modes of warfare are changing the industry; the implications of globalization on the industry; the black and gray areas of the arms trade; and much more. Volume II features an extensive A-Z glossary of terms, lists of defense firms and government agencies, annotated primary documents, lists of leading defense contractors and key weapons systems, an analysis of key legislation, and professional organizations. *The Modern Defense Industry* sets the standard for state of the art overviews of an industry that has, for better or worse, come to infuse nearly every aspect of world affairs in the early twenty-first century.

wings financial sign in: *A Responsive Technocracy?* Christian Rauh, 2016-10-21 This book challenges the common image of the European Commission as an insulated technocracy immune to political pressures. Based on an innovative combination of public opinion, protest and media data, it first demonstrates that European integration has become increasingly politicised since the 1990s. Against this background, the Commission is now much more concerned about the public appeal of its policies. That, however, challenges and contradicts the well-worn patterns of supranational regulation in Europe. Rauh systematically compares 17 legislative drafting processes in consumer policy between 1999 and 2009. Based on first-hand insider accounts of involved officials, his analysis indicates that the Commission's policy choices indeed become more consumer friendly under higher levels of public awareness. While this improves the democratic quality of European decision-making, the book also reveals an enhanced conflict potential within the Commission and beyond which threatens to undermine the efficiency of legislative decision-making in the EU.

wings financial sign in: **Transnational Australian Cinema** Olivia Khoo, Belinda Smail, Audrey Yue, 2013-03-08 To date, there has been little sustained attention given to the historical cinema relations between Australia and Asia. This is a significant omission given Australia's

geo-political position and the place Asia has held in the national imaginary, oscillating between threat and opportunity. Many accounts of Australian cinema begin with the 1970s film revival, placing "Asian-Australian cinema" within a post-revival schema of multicultural or diasporic cinema and ignoring Asian-Australian connections prior to the revival. *Transnational Australian Cinema* charts a history of Asian-Australian cinema, encompassing the work of diasporic Asian filmmakers, films featuring images of Asia and Asians, films produced by Australians working in Asia's film industries or addressed at Asian audiences, and Asian films that use Australian resources, including locations and personnel. Utilizing an interdisciplinary approach, the book considers diasporic Asian histories, the impact of government immigration and film policies on representation, and the new aesthetic styles and production regimes created by filmmakers who have forged links, both through roots and routes, with Asia. This expanded history of Asian-Australian cinema allows for a renewed discussion of so-called dormant periods in the nation's film history. In this respect, the mapping of an expanded history of cinema practices contributes to our broader aim to rethink the transnationalism of Australian cinema.
