wilson family medicine wilson nc: *A Family Practice* William D. Lindsey, William L. Russell, Mary L. Ryan, 2020-05-14 A Family Practice is the sweeping saga of four generations of doctors, Russell men seeking innovative ways to sustain themselves as medical practitioners in the American South from the early nineteenth to the latter half of the twentieth century. The thread that binds the stories in this saga is one of blood, of medical vocations passed from fathers to sons and nephews. This study of four generations of Russell doctors is an historical study with a biographical thread running through it. The authors take a wide-ranging look at the meaning of intergenerational vocations and the role of family, the economy, and social issues on the evolution of medical education and practice in the United States.

wilson family medicine wilson nc: *Family Medicine* J. L. Buckingham, E. P. Donatelle, W. E. Jacott, M. G. Rosen, Robert B. Taylor, 2013-06-29 This Second Edition of Family Medicine: Principles and Practice presents a scientific approach to health and illness in the context of mankind's most enduring societal unit-the family. This is a new book, building on the strengths of the First Edition. The emphasis of this book, like that of the specialty itself, is on the clinical delivery of health care; that is, how the practitioner manages common problems and recognizes uncommon entities encountered in office, hospital, home, and nursing home. In the First Edition, we were faced with the problem of how to organize a family medicine textbook that dealt with clinical topics yet represented more than a series of essays on the specialties for the generalist reader. We began by identifying specific objectives, outlined in the preface to the First Edition. From this evolved an approach which has been called the biopsychosocial perspective-inclusion of behavioral, family, social, and cultural aspects of health care integrated with the traditional manifestations-and-management textbook

model. The First Edition also introduced a comprehensive classification of clinical problems in family medicine now used in curriculum planning in many family practice residency programs.

wilson family medicine wilson nc: *Graduate Medical Education in Family Medicine* Rick Kellerman, Gretchen Irwin, 2025-03-29 This book outlines the basic structure and processes of family medicine residency education programs. Family medicine residency programs are complex adaptive learning organizations that involve people, processes, procedures, buildings, budgets, high stakes, mistakes, mission statements, strategies, schedules, curricula, faculty, and residents. Residency program faculty are faced with many challenges, and this book gives them and others who are interested or involved in residency programs a clear and comprehensive breakdown of family medicine graduate medical education. The volume opens with detailed overviews of several family medicine organizations that support residency programs and faculty. Subsequent chapters cover a range of topics, including best practices in resident assessment and evaluation and best practices pertinent to the development of teaching and administrative skills for faculty. Furthermore, chapters explain necessary residency education accreditation requirements, which includes the understanding of the accreditation requirements, board certification requirements, Medicare graduate medical education funding policies, and Centers for Medicare and Medicaid Services (CMMS) billing regulations. All authors have been family medicine residency program directors or faculty or have been intimately involved in residency program education. *Graduate Medical Education in Family Medicine* offers residency program directors, faculty, and residency administrators a wide-ranging and comprehensive overview of family medicine residency education as well as specific administrative and educational best practices for residency education. This book will also be useful to those physicians with experience in their clinical field, but not in educational pedagogy and andragogy.
