wilmington trust wealth management: *Du Pont Dynasty* Gerard Colby, 2014-09-16 Award-winning journalist Gerard Colby takes readers behind the scenes of one of America's most powerful and enduring corporations; now with a new introduction by the author Their name is everywhere. America's wealthiest industrial family by far and a vast financial power, the Du Ponts, from their mansions in northern Delaware's "Chateau Country," have long been leaders in the relentless drive to turn the United States into a plutocracy. The Du Pont story in this country began in 1800. Éleuthère Irénée du Pont, official keeper of the gunpowder of corrupt King Louis XVI, fled from revolutionary France to America. Two years later he founded the gunpowder company that called itself "America's armorer"—and that President Wilson's secretary of war called a "species of outlaws" for war profiteering. *Du Pont Dynasty* introduces many colorful characters, including "General" Henry du Pont, who profited from the Civil War to build the Gunpowder Trust, one of the first corporate monopolies; Alfred I. du Pont, betrayed by his cousins and pushed out of the organization, landing in social exile as the powerful "Count of Florida"; the three brothers who expanded Du Pont's control to General Motors, fought autoworkers' right to unionize, and then launched a family tradition of waging campaigns to destroy FDR's New Deal regulatory reforms; Governor Pete du Pont, who ran for president and backed Newt Gingrich's 1994 Republican Revolution; and Irving S. Shapiro, the architect of Du Pont's ongoing campaign to undermine

effective environmental regulation. From plans to force President Roosevelt from office, to munitions sales to warlords and the rising Nazis, to Freon's damage to the planet's life-protecting ozone layer, to the manufacture of deadly gases and the covered-up poisoning of Du Pont workers, to the reputation the company earned for being the worst polluter of America's air and water, the Du Pont reign has been dappled with scandal for centuries. Culled from years of painstaking research and interviews, this fully documented book unfolds like a novel. Laying bare the bitter feuds, power plays, smokescreens, and careless unaccountability that erupted in murder, Colby pulls back the curtain on a dynasty whose formidable influence continues to this day. Suppressed in myriad ways and the subject of the author's landmark federal lawsuit, Du Pont Dynasty is an essential history of the United States.

wilmington trust wealth management: The Jubak Picks Jim Jubak, 2008-12-30 The Investing Strategy for All Seasons The Jubak Picks enables you to play great offense and great defense: to make money in the stock market in good times, to protect yourself during downturns, and to reap the biggest profits when the good times return. In good times, Jubak's strategy beats the market, delivering an amazing return of 360 percent over an eleven-year period. Compare that to the S&P 500 Stock Index return of 68 percent and we are talking about real money in your pocket. But times aren't always good and no investor can make money all the time. When stocks plunge during a grinding bear market, you need a strategy for playing great defense that preserves capital, so you can pounce when good buying opportunities present themselves. And best of all, Jubak's strategy tells what ten trends and fifty stocks will make you the most money when the market rebounds. Jim Jubak's top-down stock-picking method is based on being in the right asset at the right time, ensuring that your portfolio is composed of stocks with the wind at their back and that are trending upward. He shows how to find the best stocks by first understanding ten macro trends changing the world, including: • The economies—Brazil, Russia, Vietnam, India, China, and the "rest of the gang"—driving global demand • The return of inflation—and the end of the thirty-year era of low prices • The rising tide of retirement money in an older and wealthier world—and the crucial need for companies that can properly manage it • The commodities crunch in a world ever more hungry for natural resources • The end of cheap oil • Food as the "new oil" • The decline in global financial stability and the increasing value of safe investing havens • The world finally getting serious about the environment and global warming Why heed Jim Jubak and his method? • Start with the record: Returns that have beaten all major indices by a significant factor for more than a decade...and in bad times, such as the bear market of 2007-2008, losses that are just one-third those of the major indices. • Factor in transparency: Unlike those who tell you the hot stocks for today but conveniently forget them tomorrow, the decade-long record—triumphs, warts, and lessons—is on MSNmoney.com ("Jubak's Journal"). • Add in continual updates: Jubak will provide continual updates on MSNmoney.com of his fifty picks, providing a real-time assessment of stocks that are keepers and those that should be sold. From the Hardcover edition.
